FOR IMMEDIATE RELEASE: 5/3/17

WEXLER TO SHOWCASE "DOWNSTACKER" BANDING SYSTEM AT EASTPACK 2017
ATS US-2000 PIC-STA Ultrasonic Banding System Featuring New Capacity and Efficiency Improvements

Hatfield, PA: Wexler Packaging Products, Inc. will feature the ATS US-2000 PIC-STA Ultrasonic Banding System in Booth 2707 during EastPack, June 13-15, 2017, Jacob K. Javits Convention Center, New York, NY.

Wexler Packaging Products, Inc. will showcase the ATS US-2000 PIC-STA "Downstacker" Ultrasonic Banding System, featuring new capacity and efficiency improvements for processing speeds of 60-120 products per minute while building stacks of 2 –12 (*Performance varies according to product size and stack*) for fluent, non-stop production.

The fully automatic ATS US-2000 PIC-STA is an efficient solution for a variety of products of varying shapes and sizes. After being received by an elevating conveyor belt, an intermediate downstacker transports product to be stacked, clocked and ultrasonically banded. Compact construction makes this system ideal for inline operation, with fast and easy format adjustments guaranteeing seamless integration into production lines. Maximize efficiency with the newly available glue applicator option for supportive holding force between slippery products. Also available in stainless steel. Manufactured by ATS-Tanner Banding Systems of Switzerland AG.

BENEFITS

- **Zero Damage:** material draws down and around product without causing damage.
- **Traceability:** one-step process for bundling and product identification.
- **Sustainability:** reduced material waste and energy usage = reduced carbon footprint.
- **Savings:** reduced material, energy costs and labor costs
- **Branding with Banding:** product branding for primary with pre-printed materials.
- **Efficiency.** increased production rates.
- **Integration:** ideal for inline operation.

For ATS US-2000 PIC-STA pricing and additional details, visit Booth 2707 during EastPack 2017.

ABOUT: [Wexler Packaging Products, Inc.](http://www.wexlerpackaging.com) has been in business since 1974 serving all industries as a leading provider of alternative packaging and bundling solutions.
